

## Summer Round 2018./2019.

SCHOOL	
TEAM NUMBER	
CATEGORY	<b>Year 6</b>
COMPETITION COMMISSIONER	

no.	FIRST AND LAST NAME OF PARTICIPANT	YEAR	FIRST AND LAST NAME OF MENTOR
1.			
2.			

### ANSWERS:

Year 6					
6.1.		6.4.		6.8.	
6.2.		6.5.		6.9.	
6.3.		6.6.		6.10.	
		6.7.		6.11.	
				6.12.	
				6.13.	
				6.14.	
				6.15.

Author: Maja Zelčić, mathematics professor

Revision: Sanja Stilinović, mathematics professor  
Tamara Nemeth, mathematics professor

**CORRECT ANSWER: 10 POINTS      ANSWER „E“: 0 POINTS      ELSE: -2 POINTS**

6.1. What is the result of  $1 - 2(-3) - (4 - 5) - (6 - (7 - 8) - 9)$ ?

<b>A.</b> 12	<b>B.</b> 8	<b>C.</b> -6	<b>D.</b> 10	<b>E.</b> We do not wish to answer
-----------------	----------------	-----------------	-----------------	------------------------------------

6.2. The numbers placed symmetrically around the zero on the number line are called:

<b>A.</b> Negative numbers	<b>B.</b> Opposite numbers	<b>C.</b> Reciprocal numbers	<b>D.</b> None of the aforementioned	<b>E.</b> We do not wish to answer
-------------------------------	-------------------------------	---------------------------------	---	------------------------------------

6.3. If line  $p$  is parallel to  $AB$ , what is the measure of angle  $\alpha$ ?

<b>A.</b> $56^\circ$	<b>B.</b> $36^\circ$	<b>C.</b> $66^\circ$	<b>D.</b> It cannot be determined	<b>E.</b> We do not wish to answer
-------------------------	-------------------------	-------------------------	--------------------------------------	------------------------------------

**CORRECT ANSWER: 20 POINTS      ANSWER „E“: 0 POINTS      ELSE: -4 POINTS**

6.4. What is the difference of the sums of the first 70 odd natural numbers and the first 70 even natural numbers?

<b>A.</b> 140	<b>B.</b> -140	<b>C.</b> -70	<b>D.</b> None of the aforementioned	<b>E.</b> We do not wish to answer
------------------	-------------------	------------------	---	------------------------------------

6.5. The greatest common factor of two numbers is 20, and their least common multiple is 240. How many such pairs of numbers exist?

<b>A.</b> 1	<b>B.</b> 2	<b>C.</b> 3	<b>D.</b> 4	<b>E.</b> We do not wish to answer
----------------	----------------	----------------	----------------	------------------------------------

6.6. It is not possible to construct a right-angled triangle for which you are given:

<b>A.</b> the length of leg $a$ and the length of leg $b$	<b>B.</b> the length of leg $a$ and the length	<b>C.</b> the length of the hypotenuse $c$ and a right angle	<b>D.</b> the length of the hypotenuse $c$ and the angle $\alpha$	<b>E.</b> We do not wish to answer
---	--	--	---	------------------------------------

	of the hypotenuse $c$			
--	-----------------------	--	--	--

6.7. When a bouncy ball is dropped from a certain height, it always bounces off the floor to  $\frac{4}{5}$  of its previous height. Determine, rounded to the closest centimetre, from which height we must drop the ball so that after the third bounce it reaches the height of 5 cm?

<b>A.</b> 2 cm	<b>B.</b> 8 cm	<b>C.</b> 10 cm	<b>D.</b> More than 10 cm	<b>E.</b> We do not wish to answer
-------------------	-------------------	--------------------	------------------------------	------------------------------------

**CORRECT ANSWER: 30 POINTS****ANSWER „E“: 0 POINTS****ELSE: -6 POINTS**

6.8. Let  $x$  be the number of all integers greater than  $-80$  and less than  $80$  that are divisible by  $4$ , and  $y$  the number of all integers greater than  $-50$  and less than  $50$  that are not divisible by  $5$ . What is  $x \times y$ ?

<b>A.</b> 3120	<b>B.</b> 741	<b>C.</b> 3360	<b>D.</b> None of the aforementioned	<b>E.</b> We do not wish to answer
-------------------	------------------	-------------------	---	------------------------------------

6.9. In how many equal parts (equal by shape and area) we cannot divide the figure on the image:

<b>A.</b> 4	<b>B.</b> 3	<b>C.</b> 6	<b>D.</b> None of the aforementioned	<b>E.</b> We do not wish to answer
----------------	----------------	----------------	---	------------------------------------

6.10. If a three-digit number, whose digits are all equal, is multiplied by the number made up of its last two digits, which of the digits cannot be the ones digit of the product?

<b>A.</b> 1	<b>B.</b> 2	<b>C.</b> 5	<b>D.</b> 6	<b>E.</b> We do not wish to answer
----------------	----------------	----------------	----------------	------------------------------------

6.11. In a hat, there are balls with numbers written on them, so that on each ball there is one factor of number  $24$ . No ball has the same number, and there are as many balls as there are factors of  $24$ . Ivan drew four balls, and after that, Ante drew 3 balls. Before Ante drew the balls, Ivan was sure that the sum of numbers on Ante's three balls will be a multiple of number  $3$ . Which of these statements is certainly correct?

<b>A.</b> Ivan drew the number 3	<b>B.</b> Ivan drew the number 4	<b>C.</b> The sum of Ivan's numbers is an even number	<b>D.</b> The sum of Ante's numbers is an even number	<b>E.</b> We do not wish to answer
-------------------------------------	-------------------------------------	--	--	------------------------------------

6.12. 15 equal matches need to be arranged (without breaking them) into a triangle. How many different triangles can be obtained?

<b>A.</b> 5	<b>B.</b> 6	<b>C.</b> 7	<b>D.</b> 8	<b>E.</b> We do not wish to answer
----------------	----------------	----------------	----------------	------------------------------------

6.13. How many pairs  $x$  and  $y$  of different three-digit natural numbers exist, such that their sum is 630?

<b>A.</b> 214	<b>B.</b> 215	<b>C.</b> 530	<b>D.</b> 531	<b>E.</b> We do not wish to answer
------------------	------------------	------------------	------------------	------------------------------------

6.14. Which of the squares below needs to be added to the image so that the coloured area is equal to a half of the white area?

<b>A.</b> 	<b>B.</b> 	<b>C.</b> 	<b>D.</b> 	<b>E.</b> We do not wish to answer
---------------	---------------	---------------	---------------	------------------------------------

6.15. A girl named Ika wants to go from ♣ to ♥ by writing the sequence ♣IKA♥. In how many different ways can she do that?

<b>A.</b> 16	<b>B.</b> 8	<b>C.</b> 5	<b>D.</b> None of the aforementioned	<b>E.</b> We do not wish to answer
-----------------	----------------	----------------	---	------------------------------------
